

World Food Day
Friday 16 October 2020

Grow, Nourish, Sustain.
TOGETHER.

Invitation to attend the first
UKZN World Food Day Symposium

To encourage research and technology for the development of symbiotic ecological food production systems and ensure sustainable food production, the University of KwaZulu-Natal will join the nation and the world to highlight the plight of 870 million undernourished people in the world. Most of them live in rural areas where their main source of income is agriculture. A large majority of our students come from the rural and peri-urban areas where poverty and hunger continue to inflict multidimensional traumas to livelihoods of many communities. We are developing a UKZN model of zero hunger for all students. Join us as we share views and facts about the concept of food security in the context of research, science, technology, health and social wellness.

Date: Friday, 16 October 2020
Time: 12h30 - 14h00
Platform: Virtual by free Zoom linkage
Format:
Keynote speakers from all UKZN Colleges, government and the private sector followed by open deliberations.
