

The Westville Campus Students' Representative Council together with The College of Health Science's calls upon all UKZN Stakeholders, Donors, Businesses and NGO's to support our Optometry Student Fundraiser.

OPTOMETRY STUDENTS FUNDRAISING CAMPAIGN

UKZN's Discipline of Optometry is at the forefront of developing optometric practitioners that will contribute to the visual welfare of our nation, as well as researchers who will contribute towards scholarship within the profession beyond the borders of our country. Our students learn how to correct vision by prescribing eye exercises, spectacles or contact lenses.

As part of their dynamic and comprehensive clinical training, all optometry students are required to purchase their own optometric equipment. This equipment kit is very expensive and is not covered by the National Student Financial Aid Scheme.

We appeal to donors to contribute towards the education of an optometrist by sponsoring optometric equipment to the Discipline.
