INSPIRING GREATNESS

# Call for Australian-based Alumni to Get Behind our Team!

The University of KwaZulu-Natal's entry into the World Solar Challenge is the first time that a team from Africa will be taking part in this prestigious world event.

The Hulamín Solar Car is completely UKZN designed and driven. UKZN Engineering staff and students made up the winning South African team in the 2014 South African Solar Challenge. Now they intend to pit themselves against the world's best as they race 3000 kms across the length of Australia from Darwin to Adelaide.

The World Solar Challenge is a very expensive event to compete in, given the state-of-art materials used in the design of the solar car, as well as the logistics required to ship the vehicle and fly the team to the starting line at Darwin.

To all UN, UDW and UKZN Alumni living in Australia: we appeal to you to support our team! Support can be anything from monetary contributions, to loaning your vehicle for use by the support team, to simply coming out to cheer them along the route or coming to say hello at the race's start and finish lines. Every bit of encouragement makes a huge difference to the team.

For further enquires please email team managers:

Kirsty Veale ([veale@ukzn.ac.za](mailto:veale@ukzn.ac.za)) or  
Clint Bemont ([bemontc@ukzn.ac.za](mailto:bemontc@ukzn.ac.za))
