

# Project Opportunity

## Finance and Investment Specialist

### Project Description

This project's goal is to build and implement industrial units. These units must be aligned with existing studies, plans and implementation frames. It will promote economic development, improve employment rates and investment in innovation. These units will stimulate re-industrialization and create long-term jobs.

### Role

- Package each project into an investment case
- Develop investment teasers and financial models to support the investment cases
- Attraction of potential tenants, debt and equity funders by contacting stakeholders with whom you will negotiate and develop incentive packages
- Create Industrial Unit's Fund guidelines
- Elaborate budgets
- Financial Reporting

### Skills and Experience Required

- CFA/CA
- Business/Finance Degree
- 7 or more years of experience in financial management/banking/investment areas

### Availability

This role will requires you to be available 130 days per year.
