

The University of KwaZulu-Natal Corporate Relations Division and the College of Agriculture, Engineering and Science

Cordially invite you to a Webinar

INTRODUCING UKZN'S NEW DEGREE IN BACHELOR OF SCIENCE IN GEOGRAPHIC INFORMATION SYSTEMS (GIS) AND EARTH OBSERVATION

Are you interested in earth observation and space science? GIS and Earth Observation is one of the fastest growing fields and careers available in the private, public, and academic sectors. Find out more about the Geographical Information Industry, concepts that will be covered in this course, translating the real world into a virtual model, and the type of analytical and interpretation skills you would learn in communicating data to others. This webinar will also explain the minimum subject entry requirements for the BSc GIS-EO degree, the duration, and career paths leading from studying this degree.
